1. **Identify the problem.** The first step is to identify the problem. In this case, the problem is that the company is not meeting its sales targets.

2. **Analyze the problem.** The next step is to analyze the problem. This involves identifying the causes of the problem and determining the impact of the problem.

3. **Develop a solution.** The third step is to develop a solution. This involves identifying the actions that need to be taken to solve the problem.

4. **Implement the solution.** The fourth step is to implement the solution. This involves putting the solution into action.

5. **Evaluate the solution.** The fifth step is to evaluate the solution. This involves determining whether the solution has been effective in solving the problem.
